Essential management characteristics:

European Equities Fund

The Sub-Fund seeks to outperform the MSCI Europe Infrastructure Net Index on the recommended investment term. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria.

The Sub-Fund is managed taking into consideration Responsible and Sustainable principles and promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. The targeted activities may also include, but not limited to, technologies and equipment providers that have a proven positive impact on energy efficiency for infrastructures and mobility issues. The investment process is based on the following four stages: (i) SRI stocks selection through financial and extra-financial approach, (ii) fundamental stock selection (iii) valuation based on multicriteria analysis to assess the upside potential of the selected stocks and (iv) portfolio construction weighting each stock according to its risk/rewards liquidity and diversification impact on the portfolio.

The Sub-Fund will invest at any time within the following limits in:

- European Equities or related financial derivative instruments (such as CFD or DPS): 75% to 100% of its net assets,
- up to 25% of its net assets in Non-European equities,
