DNCA Invest - South Europe Opportunities - Class N - EUR

A sub-fund of the SICAV DNCA INVEST - ISIN: LU1234713342

This fund is managed by DNCA FINANCE

Objectives and Investment Policy

Essential management characteristics:

South European Equities

The Sub-Fund seeks to outperform the following composite Index net return: 55% FTSE MIB, 40% IBEX, 5% PSI20 calculated with dividends reinvested, over the recommended investment term.

The Sub-Fund will at all times invest at least two-thirds of its total assets in equities of issuers having their registered office in South Europe (Italy, Spain, Portugal, Greece) or exercising the preponderant part of their economic activities in South Europe or the securities of which are dealt in a Regulated Market. The Sub-Fund's investment strategy relies on active discretionary management using a stock picking policy and a rigorous portfolio construction methodology. The stock selection is based on fundamental analysis: value creation process assessed using financial and extra-financial indicators, financial model relevance and management quality. Then, the valuation based on multicriteria analysis (PE, EV/EBITDA, FCF yield, Sum of the Part...) assesses the upside potential. Finally, the weighting of the stocks in the portfolio is based on the intensity of the conviction, its upside potential and its liquidity to obtain a diversified and liquid portfolio. The Sub-Fund is also managed taking into consideration Responsible and Sustainable principles. In this way, the investment process and resulting stock picking take into account internal scoring with respect to both corporate responsibility and sustainability of the companies. In line with socially responsible investing ("SRI") management, issuers are also selected according to ESG criteria which involves to exclude at least 20% of the worst issuers of shares from its investment universe and therefore not investing in these issuers. Additional information on SRI strategy may be obtained in the prospectus of the Sub-Fund.

The Sub-Fund may invest at any time within the following limits in:

- South European equities or related financial derivatives instruments (such as CFD or DPS): 75% to 100% of its total assets,
- Non-South European or European equities: from 0 to 10% of its net assets,
- Debt instruments including money market instruments in case of adverse market conditions: 0% to 25% of its net assets
- up to 10% of its net assets in units and/or shares of UCITS and/or AIFs.

The Sub-Fund may invest in securities denominated in any currency. However non-base currency exposure may be hedged back to the base currency to moderate currency exchange risks. More specifically, futures and currency forwards may be used for that purposes.

Exchange traded or OTC derivatives (other than CFD and DPS) can represent up to 40% of the Sub-Fund's net assets, including but not limited to, futures, contracts and non complex options negotiated on regulated markets for the purpose of hedging or increasing equity exposure without seeking overexposure.

The Sub-Fund is eligible to the PEA (french equity savings plan).

Benchmark Information : The Sub-Fund is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Investment Manager is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Investment Manager is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

---	---	---	---	---	---	---

The historical data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile of the UCITS. The risk category associated with this sub-fund is not guaranteed and may change over time. The weakest category does not mean no risk. The risk level of this UCITS is due to exposure to equity and/or fixed income markets. The fund does not benefit from any capital protection or guarantee.

Material risks not taken into account in this indicator:

Credit risk: in the event that an issuer is downgraded, the value of the bonds in the portfolio may fall, thus decreasing the sub-fund's net asset value.

The occurrence of one of these risks may lead to a reduction in the net asset value.
