What is this product ?

TYPE

This Product is a sub-fund of DNCA Invest SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

TERM

The Product is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The investment objective of DNCA Invest - Global Convertibles (the "Product") is to outperform the Refinitiv Convertibles Global Focus Hedged (EUR) Index (UCBIFX14) over the recommended minimum investment period by investing in global convertible bonds markets. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria.

The Product implements active conviction management and SRI approach. In this way, the investment process and resulting stock and bond picking take into account internal scoring with respect to both corporate responsibility and sustainability of the companies based on an extra-financial analysis through a proprietary rating model (ABA, Above & Beyond Analysis) developed internally by the Management Company. This model is centered on pillars as further detailed below (i) corporate responsibility, (ii) sustainable transition, (iii) controversies and (iv) dialogue and engagement with issuers. The Management Company uses a proprietary ESG analysis approach with the "best in universe" method. There is a risk that this data is incorrect, insufficient or missing. There may be a sector bias. The investment process is based on the selection of the investment universe combining a financial and extra-financial approach with three steps: (i) Selection of the investment universe combining a financial (quantitative and micro-economic) and extra-financial (qualitative) approach and exclusion of issuers which have a high-risk profile in terms of corporate responsibility (rating below 2/10 in the ESG proprietary tool) or exposed to major controversies. This extra-financial analysis is made on at least 90% of the Product's assets and entails excludes a minimum of 20% of the issuers from its investment universe, (ii) build the portfolio with a "Top down" approach and (iii) selection of securities ("Bottom up" approach) on the basis of multi-factor analysis.

The Product is based on a fully discretionary investment strategy within the global convertible bonds markets. The investment strategy of the Product is based on an active selective of convertibles bonds and results from a combination of a "top-down" approach (i.e. an approach that consists in taking into account the overall portfolio allocation and then selecting the transferable securities comprising the portfolio) and of a "bottom-up" approach (i.e. a selection of transferable securities comprising the portfolio followed by a global analysis of the portfolio) aiming at the choice of issuers and the issues selection. This investment strategy is the main source of expected return. In addition, the Product is managed taking into consideration responsible and sustainable principles. The Product will at all times invest at least 50% of its total assets in convertible bonds exchangeable bonds and mandatory redeemable bonds of issuers having their registered office in the OECD member countries. In order to achieve its investment objective, the Product may be exposed up to a maximum of 40% of its net assets in convertible bonds from issuers in emerging countries. Therefore, the Product may be exposed the high yield transferable securities. The Product may also invest up to 5% of its total assets in bonds listed on the China Interbank Bonds Market through the mutual bond market access between Mainland China and Hong Kong (the "Bond Connect"). The Product will not invest in securities which qualify as distressed (having a Standard & Poor's rating below CCC or being considered as equivalent by the Management Company using similar criteria at the time of the purchase) or as "in default" at the time of investment. The Product may be exposed up to 15% of its net assets to the equity markets. The Product does not intend to invest directly in American Depositary Receipts (ADRs) or Global Depositary Receipts (GDRs) but may held those assets up to 10% of the net assets in case of conversion of convertibles, exchangeable bonds and/or mandatory redeemable bonds. Such securities received may be disposed of with due regards to interest of shareholders. The Product may invest in money market and debt instruments: from 0% to 50% of its total assets. The Product can be exposed to all currencies other than the Euro, bringing the exchange risk to 105% maximum of its net assets. Non-based currency exposure may be hedged back to the base currency to moderate currency exposure risks.

The Product may invest up to 10% of its net assets in units and/or shares of UCITS and/or other UCIs and/or regulated AIFs open to non- professional investors and/or ETFs. The Product may use exchange traded or OTC derivatives, including but not limited to, futures contracts and non-complex options negotiated on regulated markets for the purpose of hedging or increasing equity risk, credit risk and/or interest rate risk. The Product may invest in securities denominated in any currency. However non-base currency exposure may be hedged back to the base currency to moderate currency exchange risks. More specifically, futures, and currency forwards may be used for that purpose.

The Product is actively managed. This means the Management Company is taking investment decisions with the intention of achieving the Product's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The investment universe of the Product is limited by the constituents of the benchmark, but the Product may take positions whose weightings diverge from the benchmark. The deviation from the benchmark may be significant. The reference benchmark does not intend to be consistent with the environmental or social characteristics promoted by the Product.

This is an accumulation share.

INTENDED RETAIL INVESTORS

The Product is intended for retail investors who have no financial knowledge or experience of the financial sector. The Product is intended for investors who can withstand capital losses and who do not require a capital guarantee.

What are the risk and what could I get in return ?

Risk indicator

This risk indicator assumes you keep the Product for 4 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Product lie in the possibility of depreciation of the securities in which the Product is invested.

This product is rated 3 out of 7, representing a risk class between low and medium.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Other risks materially relevant to the Product and which could lead to a fall in the net asset value to which the indicator gives too little consideration : operational risk.

As this product does not provide protection against the vagaries of the market, you could lose all or part of your investment.

PERFORMANCE SCENARIOS

This figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not takes into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances. The stress scenario shows what you might get back in extreme market circumstances. What you get will depend on market trends and how long you keep the Product.

Recommended holding period : 4 years Example Investment : 10,000 €		If you exit after 1 year	If you exit after 4 years
Scenarios	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	6,940 €	6,660 €
	Average return each year	-30.60 %	-9.70 %
Unfavourable	What you might get back after costs	7,950 €	8,610 €
	Average return each year	-20.50 %	-3.70 %
Moderate	What you might get back after costs	10,330 €	10,600 €
	Average return each year	3.30 %	1.50 %
Favourable	What you might get back after costs	13,380 €	13,270 €
	Average return each year	33.80 %	7.30 %

- The unfavourable scenario occured for an investment between December 2020 and December 2024.
- The moderate scenario occured for an investment between March 2019 and March 2023.
- The favourable scenario occured for an investment between February 2017 and February 2021.

What happens if DNCA Finance is unable to pay out ?

The Product is a co-ownership of financial instruments and deposits separate from DNCA Finance. In the event of the default of DNCA Finance, the assets of the Product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the Product is mitigated due to the legal segregation of the depositary's assets from those of the Product.

What are the costs ?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COST OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed :

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. ;
- EUR 10 000 is invested.

Investment : 10,000 €	If you exit after 1 year	If you exit after 4 years
Total costs	365 €	937 €
Annual cost impact *	3.60 %	2.20 % each year

*The annual cost impact illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 3.70 % before cost and 1.50 % after costs..

We may share part of costs with the person selling you the Product to cover the services they provide to you. These figures include the maximum distribution fee and which amount of 100% of costs. This personne will inform you of the actual distribution fee.

COMPOSITION OF COSTS

One-off upon entry or exit		If you exit after 1 year
Entry costs	Up to 2.00 % of the amount you pay in when entering this Investment. This is the most you will be charged. The person selling you the production will inform you of the actual charge..	up to 200 €
Exit cost	We do not charge an exit fee for this product..	0 €
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.40 % of the value of your investment per year. This is an estimate based on actual costs over the last year..	140 €
Transaction costs	0.25 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell..	25 €
Incidental costs taken under specific conditions		
Performance fees	20% of the positive performance net of any fees above the Refinitiv Convertibles Global Focus Hedged (EUR) Index. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	0 €

How long should I hold it can I take my money out early ?

Recommended holding period : 4 years

Shareholders may redeem shares on demand and executed on each NAV calculation and publication day before 12.00 noon (Luxembourg time).

The recommended holding period was chosen depending on the asset class, investment strategy and risk profile of the Product, to enable it to achieve its investment objective while minimizing the risk of loss.

You can redeem all or part of your investment at any time before the end of the recommended holding period, or hold it longer. There are no penalties for early divestment. However, if you request redemption before the end of the recommended holding period, you may receive less than expected.

The Product features a redemption gating mechanism (“Gates”) and a net asset value adjustment mechanism with a trigger threshold (“Swing Pricing”), as described in the prospectus.

How can I complain ?

If you have any compliants about the Product, you can send a written request with a description of the problem either by e-mail service.conformite@dnca-investments.com or to the following address: DNCA Finance, 19 Place Vendôme, 75001 Paris.
