What is this product ?

TYPE

This Product is a sub-fund of DNCA Invest SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

TERM

The Product is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The investment objective of the Sub-Fund is to seek performance by investing in equities leading listed real estate and traded in the major stock markets of developed European countries, over the recommended investment term of 5 years. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria.

The Product is managed taking into consideration Responsible and Sustainable principles and has as its objective sustainable investment within the meaning of Article 9 of SFDR. The Product is managed taking into consideration responsible and sustainable principles and aims to be target issuers with a exposure of percentage or their revenues to the 17 Sustainable Development Goals of the United Nations. The investment process take into account internal scoring based on an extra-financial analysis through a proprietary rating model (ABA, Above & Beyond Analysis) developed internally by DNCA. The risk exists that the models used to make these investment decisions do not perform the tasks they were designed to. The use of the proprietary tool relies on the experience, relationships and expertise of DNCA with the "best in universe" method. There may be a sector bias. The Product will proceed to the extra-financial analysis on at least 90% of its securities, while excluding 20% of the worst issuers from its investment universe. Additional information on SRI strategy may be obtained in the prospectus of the Product. Through active management of a portfolio of Euro denominated equities and fixed income products, it aims to provide an alternative to investments in bonds and convertible bonds (directly or through mutual funds) as well as an alternative to Euro denominated funds. The Product however does not benefit from a guarantee on capital invested. The investment process is based on the following three stages: (i) exclusion of companies with high corporate responsibility risks, (ii) selection of issuers and companies identified to meet the Product's sustainable strategy and (iii) build the portfolio pursuant to a fundamental analysis, the liquidity and the valuation of the companies considered.

The Sub-Fund invests in quality companies with a visibility of their growth based on structural trends directly or indirectly related to the real-estate sector such as the expansion of e-commerce, sustainable development, the ageing of the population or urbanization. These companies operate in a wide variety of market segments, for example: homes, offices, distribution, logistics, storage, student residences or retirement homes. The Sub-Fund's philosophy is particularly to focus on companies that have a strong social and/or environmental impact. This impact is evaluated through their exposure (in terms of turnover, R&D expenses or capex) via the proprietary model of the Management Company. The impacts are based on five long-term transitions: economic transition, life style transition, medical transition, demographic transition and energy transition. The Sub-Fund may at any time be exposed to equities and similar or rights having their registered office or domiciled in Euro Zone Countries: from 65% to 105% of its net assets; equities from issuers having their registered office or domiciled outside Euro Zone Countries (including emerging countries): up to 35% of its net assets (directly or through UCI); equities with small capitalization i.e. total market capitalization below 1 billion EUR or any other currency: up to 50% of its net assets; fixed income securities from issuers having their registered office in a country which is an OECD member state or fixed income securities issued or guaranteed by a member state of OECD: up to 10% of its net assets; money market instruments or deposits if market conditions are unfavorable: from 0% to 20% of its net assets; other financial instruments (within the meaning of Article 41 (2) a) of the Law) up to 10

% of its net assets. Exposure to exchange risk may reach 35 % of the Sub-Fund's net assets.

The Sub-Fund may use exchange traded or OTC derivatives, including but not limited to, futures contracts, futures on market index, options on market index, swaps and non-complex options for the purpose of hedging or increasing equity exposure. Equity swap may be used only for the purpose of hedging equity exposure. In order to achieve the investment objective, the Sub-Fund may also invest its net asset in equities or related financial derivative instruments (such as CFD or DPS) as well as in, convertibles bonds, warrants and rights which may embed derivatives, for the purpose of hedging or increasing equity and exchange risk without seeking overexposure.

The Product is actively managed and uses the benchmark for performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Product's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

This is an accumulation share.

INTENDED RETAIL INVESTORS

The Product is intended for retail investors who have no financial knowledge or experience of the financial sector. The Product is intended for investors who can withstand capital losses and who do not require a capital guarantee.

What are the risk and what could I get in return ?

Risk indicator

This risk indicator assumes you keep the Product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Product lie in the possibility of depreciation of the securities in which the Product is invested.

This product is rated 5 out of 7, representing a medium to high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Other risks materially relevant to the Product and which could lead to a fall in the net asset value to which the indicator gives too little consideration : operational risk.

As this product does not provide protection against the vagaries of the market, you could lose all or part of your investment.

PERFORMANCE SCENARIOS

This figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not takes into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances. The stress scenario shows what you might get back in extreme market circumstances. What you get will depend on market trends and how long you keep the Product.

Recommended holding period : 5 years Example Investment : 10,000 €		If you exit after 1 year	If you exit after 5 years
Scenarios	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	5,080 €	2,510 €
	Average return each year	-49.20 %	-24.20 %
Unfavourable	What you might get back after costs	6,170 €	5,100 €
	Average return each year	-38.30 %	-12.60 %
Moderate	What you might get back after costs	10,060 €	6,800 €
	Average return each year	0.60 %	-7.40 %
Favourable	What you might get back after costs	12,510 €	10,380 €
	Average return each year	25.10 %	0.80 %

- The unfavourable scenario occured for an investment between May 2018 and May 2023.
- The moderate scenario occured for an investment between March 2021 and March 2026.
- The favourable scenario occured for an investment between November 2016 and November 2021.

What happens if DNCA Finance is unable to pay out ?

The Product is a co-ownership of financial instruments and deposits separate from DNCA Finance. In the event of the default of DNCA Finance, the assets of the Product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the Product is mitigated due to the legal segregation of the depositary's assets from those of the Product.

What are the costs ?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COST OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed :

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. ;
- EUR 10 000 is invested.

Investment : 10,000 €	If you exit after 1 year	If you exit after 5 years
Total costs	380 €	881 €
Annual cost impact *	3.80 %	2.20 % each year

*The annual cost impact illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be -5.20 % before cost and -7.40 % after costs..

We may share part of costs with the person selling you the Product to cover the services they provide to you. These figures include the maximum distribution fee and which amount of 100% of costs. This personne will inform you of the actual distribution fee.

COMPOSITION OF COSTS

One-off upon entry or exit		If you exit after 1 year

Exit cost	We do not charge an exit fee for this product..	0 €

Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.60 % of the value of your investment per year. This is an estimate based on actual costs over the last year..	160 €
Transaction costs	0.04 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell..	4 €
Incidental costs taken under specific conditions		
Performance fees	20% of the positive performance net of any fees above FTSE EPRA Eurozone capped Euro Index. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	16 €

How long should I hold it can I take my money out early ?

Recommended holding period : 5 years

Shareholders may redeem shares on demand and executed on each NAV calculation and publication day before 12.00 noon (Luxembourg time).

The recommended holding period was chosen depending on the asset class, investment strategy and risk profile of the Product, to enable it to achieve its investment objective while minimizing the risk of loss.

You can redeem all or part of your investment at any time before the end of the recommended holding period, or hold it longer. There are no penalties for early divestment. However, if you request redemption before the end of the recommended holding period, you may receive less than expected.

The Product features a redemption gating mechanism (“Gates”) and a net asset value adjustment mechanism with a trigger threshold (“Swing Pricing”), as described in the prospectus.

How can I complain ?

If you have any compliants about the Product, you can send a written request with a description of the problem either by e-mail service.conformite@dnca-investments.com or to the following address: DNCA Finance, 19 Place Vendôme, 75001 Paris.
