

# CENTIFOLIA

## FRENCH VALUE EQUITIES

### Investment objective

The investment objective is to seek to outperform the CAC 40 index calculated on the basis of dividends reinvested over the recommended investment period, in particular by selecting stocks meeting socially responsible investment criteria. To achieve its investment objective, the investment strategy is based on active discretionary management.

## Portfolio managers comments

In March, equity markets were severely shaken by the conflict in Iran following Donald Trump's attack on February 28, which led to the blockade of the Strait of Hormuz, through which 20% of global oil production passes. This caused Brent crude to surge (+63.3%) and WTI crude to rise (+51.4%).

The themes of cyclical recovery and falling interest rates were set aside in favor of a focus on the Middle East, energy risks, and fears of stagflation. The initial perception of a short war shifted on March 7, when strikes expanded to target Iranian energy infrastructure (depots and storage facilities). The duration of the conflict and its impact on the global economy then became central concerns.

On March 23, Donald Trump announced a five-day pause in strikes targeting Iranian energy facilities, extended until April 6, while seeking a negotiated path through Pakistan. Meanwhile, Israel continued its strikes, Iran rejected any direct negotiations and maintained military pressure, while the Europeans opted for a purely diplomatic response. As of March 31, behind-the-scenes discussions are underway, but fighting continues.

Major central banks all left their rates unchanged, but adopted a notably more cautious tone regarding inflation. The Fed kept its rates at 3.5%/3.75%, highlighting the uncertainty created by the conflict and rising energy costs; the ECB kept its deposit rate at 2.0%, emphasizing the risk of higher inflation and weaker growth; the BoE kept its rate at 3.75%, warning of second-round effects. The 10-year U.S. Treasury yield rose 38 basis points over the month to 4.32%. The Bund ended the month at 3.0% (+26 bps).

By sector, Energy (+14.5%) dominated the market by a wide margin, while Chemicals (-2.7%) and Telecoms (-3.6%) held up relatively well. Conversely, Real Estate (-14.5%), Construction (-12.2%), and Industrials (-11.85%) were heavily penalized by rising rates and fears of slowing demand and rising energy costs.

Since the start of the year, Centifolia has gained 0.45% compared to -3.99% for the CAC40 NR. In March, the fund held up much better than its index, posting a performance of -6.51% compared to -8.83% for its index.

The month's performance was driven by exposure to Energy (TotalEnergies +22%, Viridien +24%), STMicroelectronics (+1%), and Sanofi (+1%). Conversely, Canal Plus (-35%), Société Générale (-16%), and Saint-Gobain (-19%) weighed on performance.

During the month, Thales was removed from the portfolio. Earnings expectations optimistically factor in growth driven by the exponential increase in military spending. At 24x (12M P/E) based on these optimistic expectations, the stock can no longer be considered a "value" stock.

March validated the caution we have shown in recent months and our rigorous approach to company valuation. Despite the correction, market valuations remain historically high and are coupled with earnings expectations for 2026 that remain optimistic. In this increasingly volatile environment, Centifolia remains true to its philosophy of prioritizing companies that generate strong cash flow, have a healthy balance sheet, and are reasonably or even undervalued. Its 2026 P/E ratio stands at 9.7x, compared to 14.5x for the CAC 40.

**Internal extra-financial analysis**

**ABA coverage rate<sup>+</sup> (99.6%)**

**Average Responsibility Score: 4.8/10**

**Responsibility risk breakdown<sup>(1)</sup>**

**Transition/CSR exposure<sup>(2)</sup>**

**SDG's exposure<sup>(3)</sup> (% of revenues)**

**Sustainable transitions exposure<sup>(4)</sup>**

**Analysis methodology**

We develop proprietary models based on our expertise and conviction to add tangible value in the selection of portfolio securities. DNCA's ESG analysis model, Above & Beyond Analysis (ABA), respects this principle and offers a rating that we control the entire construction. Information from companies is the main input to our rating. The methodologies for calculating ESG indicators and our responsible investor and engagement policy are available on our website [by clicking here](#).

<sup>(1)</sup> The rating out of 10 integrates 4 risks of responsibility: shareholder, environmental, social and societal. Whatever their sector of activity, 24 indicators are evaluated, such as social climate, accounting risks, suppliers, business ethics, energy policy, quality of management.

<sup>(2)</sup> The ABA Matrix combines the Responsibility Risk and the Sustainable Transition exposure of the portfolio. It allows us to map companies to be mapped using a risk/opportunity approach.

<sup>(3)</sup> 1 No poverty. 2 Zero hunger. 3 Good health and well-being. 4 Quality education. 5 Gender equality. 6 Clean water and sanitation. 7 Clean and affordable energy. 8 Decent work and economic growth. 9 Industry, innovation and infrastructure. 10 Reduced inequalities. 11 Sustainable cities and communities. 12 Sustainable consumption and production. 13 Tackling climate change. 14 Aquatic life. 15 Terrestrial life. 16 Peace, justice and effective institutions. 17 Partnerships to achieve the goals.

<sup>(4)</sup> 5 transitions based on a long-term perspective of the financing of the economy allow the identification of activities with a positive contribution to sustainable development and to measure the exposure of companies in terms of turnover as well as exposure to the UN Sustainable Development Goals.

\*The coverage rate measures the proportion of issuers (equities and corporate bonds) taken into account in the calculation of the extra-financial indicators. This measure is calculated as a % of the net assets adjusted for cash, money market instruments, derivatives and any vehicle outside the scope of "listed equities and corporate bonds".

It should be noted that DNCA Finance changed its non-financial data provider in October 2023 from monitoring negative externalities by the Scope Rating provider to monitoring performance indicators (PAI) by the MSCI provider.

This change of supplier and indicator typology prevents DNCA Finance from producing a 3-year ESG performance comparison. DNCA Finance Committed to produce this historical data from the data available in December 2023.

## Glossary

**Beta.** Measures the average extent to which a fund moves relative to the broader market. The beta of a market is 1. A fund with a beta of more than 1 moves on average to a greater extent than the market. A fund with a beta of less than 1 moves on average to a lesser extent. If beta is a minus number, it is likely that the stock and the market move in opposite directions.

**Correlation coefficient.** The correlation coefficient is a measure of correlation. It is used to determine the relationship between two assets over a given period. A positive coefficient means that the two assets move in the same direction. Conversely, a negative coefficient means that the assets move in the opposite direction. The correlation or decorrelation can be more or less strong and varies between -1 and 1.

**Dividend yield.** Annual dividends per share / Price per share

**EV (Enterprise Value).** Market value of common stock + market value of preferred equity + market value of debt + minority interest - cash and investments.

**Information ratio.** The information ratio is an indicator of the outperformance of a fund compared to its benchmark. The higher the information ratio, the better the fund. It is calculated as follows: Information ratio = Relative Annualised Performance / Tracking Error.

**ND/EBITDA (Net Debt / EBITDA).** A measurement of leverage, calculated as a company's interest-bearing liabilities minus cash or cash equivalents, divided by its EBITDA. The net debt to EBITDA ratio is a debt ratio that shows how many years it would take for a company to pay back its debt if net debt and EBITDA are held constant.

**P/B.** The Price to Book Ratio is the ratio of the market value of equity (market capitalisation) to its book value. It is used to compare the market valuation of a company with its book value.

**P/CF (Share price/Cash Flow per Share).** The price-to-cash-flow ratio is an indicator of a stock's valuation.

**PER (Price Earnings Ratio).** A company's share price divided by the amount of profits it makes for each share in a 12-month period. PE ratios are normally calculated on the base of all the profit made in the period, whether or not the profit is paid out to shareholders in that period.

**ROE (Return On Equity).** The amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested.

**Sharpe ratio.** The Sharpe ratio measures the excess return over the risk-free money rate of an asset portfolio divided by the standard deviation of that return. It is therefore a measure of the marginal return per unit of risk. It is used to measure the performance of managers with different risk policies.

**Tracking error.** Tracking Error is a measure of how closely an investment portfolio follows the index against which it is benchmarked. It is the difference in the return earned by a portfolio and the return earned by the benchmark against which the portfolio is constructed. For example, if a bond portfolio earns a return of 5.15% during a period when the portfolio's benchmark (say, for example, the Lehman Brothers Index) produces a return of 5.06%, the tracking error is .09%, or 9 basis points.

**Volatility.** A statistical measure of the fluctuations of a security's price. It can also be used to describe fluctuations in a particular market. High volatility is an indication of higher risk.

A summary of investors' rights is available in English at the following link: <https://www.dnca-investments.com/en/regulatory-information>

This product promotes environmental, social and governance (ESG) criteria within the meaning of Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the 'SFDR'). Please note that any decision to invest in the Fund should take into account all of its characteristics and objectives as described in the prospectus.

This product is subject to sustainability risks as defined in the Regulation 2019/2088 (article 2(22)) by environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

If the portfolio investment process can incorporate ESG approach, the portfolio's investment objective is not primarily to mitigate this risk. The sustainability risk management policy is available on the website of the Management Company.

The reference benchmark as defined in the Regulation 2019/2088 (article 2(22)) does not intend to be consistent with the environmental or social characteristics promoted by the fund.

## Additional notes

This material has been provided for information purposes only to investment service providers or other Professional Clients, Qualified or Institutional Investors and, when required by local regulation, only at their written request. This material must not be used with Retail Investors. It is the responsibility of each investment service provider to ensure that the offering or sale of fund shares or third party investment services to its clients complies with the relevant national law.

Please read the Prospectus and Key Information Document carefully before investing. If the fund is registered in your jurisdiction, these documents are also available free of charge and in the official language of the country of registration at the Natixis Investment Managers website ([im.natixis.com/intl/intl-fund-documents](http://im.natixis.com/intl/intl-fund-documents)).

To obtain a summary of investor rights in the official language of your jurisdiction, please select the appropriate country/your location and then consult the legal documentation section of the website ([im.natixis.com/intl/intl-fund-documents](http://im.natixis.com/intl/intl-fund-documents)).
