What is this product?

TYPE OF PRODUCT

The product is a Sub-Fund of DNCA Invest (the "Fund"), an Undertaking for collective investment in transferable securities (UCITS) under the laws of the Grand-Duchy of Luxembourg.

TERM

The Sub-Fund is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The Sub-Fund seeks to provide, throughout the recommended investment period of more than three years, a higher performance, net of any fees, than the SOFR index plus 2%. This performance objective is sought by associating it to a lower annual volatility than 5% in normal market conditions.
The investment process is made of the combination of strategies including:

- a long/short directional strategy aiming to optimize the performance of the portfolio based on interest rate and inflation expectations;
- an interest rate curve strategy aiming to exploit the variations of the spreads between long-term rates and short-term rates;
- an arbitrage strategy aimed at seeking the relative value on various bond asset classes;
- a credit strategy founded on the usage of bonds issued by the private sector.

The modified duration of the Sub-Fund will stay between -3 and +7, without any restriction on the modified duration of individual securities in the Sub-Fund.
The Sub-Fund will at all times invest no more than 25% of its total assets in bonds in any currency from non-OECD issuers. The Sub-Fund will be solely invest in securities having a rating of at least B- by Standard & Poor's or being considered as equivalent, at the time of purchase. Fixed Income securities which may be downgraded during their lifetime under B- grade may not exceed 10% of its total assets.
The Sub-Fund mainly invests in fixed rate, floating rate or inflation-indexed debt securities and negotiable debt within the following limits:

- Convertible or exchangeable bonds: up to 100% of its total assets and Contingent convertible bonds (Coco Bonds) : at most 20% of its total assets,
- Equities (through exposure from convertible bonds, synthetic convertibles bonds or options on future equity market): up to 10% of the Sub-Fund's asset may be exposed to the stock market.

The Sub-Fund may invest up to 10% of its net assets in units and/or shares of UCITS and/or other UCIs.
The Sub-Fund will use all types of eligible derivatives instruments traded on regulated or OTC markets when these contracts are better suited to the management objective or offer lower trading costs. These instruments may include, but are not restricted to: futures, options, swaps, CDS on indices, CDS. The Sub-fund may invest in securities denominated in any currency. The non-base currency exposure may be hedged back to the base currency to moderate the currency exchange risks which will not represent more than 30% of the total assets of the Sub-Fund.
The Sub-Fund is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

INTENDED RETAIL INVESTORS

What are the risks and what could I get in return?

RISK INDICATOR

Lower risk **Higher risk**

The risk indicator assumes you keep the product for 3 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Sub-Fund lie in the possibility of depreciation of the securities in which the Sub-Fund is invested.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment		3 years USD 10 000		
		If you exit after 1 year	**If you exit after 3 years**

What happens if the Fund is unable to pay out?

There is no guarantee in place against the default of the Sub-Fund and you could lose your capital if this happens.

The Sub-Fund's assets are held with BNP Paribas, Luxembourg Branch and are segregated from the assets of other sub-funds of the Fund. The assets of the Sub-Fund cannot be used to pay the debts of other sub-funds.

The Sub-Fund would not be liable in the event of failure or default of the Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.
The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested.

Investment of USD 10 000	**If you exit after 1 year**	**If you exit after 3 years**
Total costs	USD 223	USD 513
Annual cost impact (*)	2.2%	1.6%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.9% before costs and 3.3% after costs.
