What is this product?

TYPE OF PRODUCT

The product is a Sub-Fund of DNCA Invest (the "Fund"), an Undertaking for collective investment in transferable securities (UCITS) under the laws of the Grand-Duchy of Luxembourg.

TERM

The Sub-Fund is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The Sub-Fund seeks to outperform of the following index denominated in Euro: Euro Stoxx NR (Bloomberg ticker: SXXT Index) calculated with dividends net of withholding taxes reinvested, over the recommend investment term. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria. The investment strategy is based on a climate strategy which combines the classic requirements of risk and financial return with the low carbon transition requirements in line with the Paris Agreement as signed on 22 April 2016 (the "Paris Agreement"). The Sub-Fund has as its objective sustainable investment within the meaning of Article 9 of SFDR. The Sub-Fund aims to align the economy on a path of at least 2 degrees. This objective is materialized by an average decrease of the portfolio carbon intensity of at least 2,5% each year by comparing the carbon intensity of each consolidated company in the Sub-Fund with the carbon intensity of the previous year. In addition, the investment strategy is oriented towards a contributive economy to the climate issues resulting in avoided CO2 emissions greater than the induced CO2 emissions (scope 1 and 2). In addition, the management style proposed aims to achieve to climate objectives of the Paris Agreement, combined with an approach broadened to other positive impacts relating to sustainable development and, in particular, the Sustainable Development Goals ("SDGs") adopted by the United Nations. The investment process is geared towards long-term performance that integrates all the risks and challenges faced by companies. The investment choices result of a fundamental analysis of companies which, as part of a climate strategy, is combined with an in-depth and detailed analysis of the positioning of each company within the low carbon transition. A proprietary "transition / contribution" climate methodology allows the management team to identify companies that have put in place appropriate efforts to decarbonize their activities in line with the objectives of the Paris Agreement (i.e. "keeping a global temperature rise this century well below 2 degrees Celsius above pre-industrial levels and to pursue efforts to limit the temperature increase even further to 1.5 degrees Celsius"). The results of this proprietary "transition / contribution" climate methodology will be binding on the Investment Manager. Additional information on SRI strategy may be obtained in the prospectus of the Sub-fund. The Sub-Fund may at any time invest in:

- Equities of issuers having their registered office in the Euro zone: from 65% to 100% of its net assets;
- Equities outside the Euro zone: from 0% to 35% of its net assets;
- Equities with total market capitalisation below 200 million euros up to 10% of its net assets;
- Fixed income securities and money market instruments or deposits if market conditions are unfavourable: from 0% to 35% of its net assets;
- Other financial instruments up to 10% of its net assets.

Exposure to exchange risk may reach 35% of the Sub-Fund's net assets.

The Sub-Fund may invest up to 10% of its net assets in units and/or shares of UCITS and/or AIFs. The Sub-Fund may invest in securities denominated in any currency. However non-base currency exposure may be hedged back to the base currency to moderate currency exchange risks. More specifically, futures and currency forwards may be used for that purposes.

The Sub-Fund may use exchange traded or OTC derivatives up to 25% of the Sub-Fund's net assets, including but not limited to, futures contracts and non-complex options negotiated on regulated markets for the purpose of hedging equity exposure without seeking overexposure.

The Sub-Fund is eligible to the PEA (French equity savings plan).

The Sub-Fund is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Sub-Fund lie in the possibility of depreciation of the securities in which the Sub-Fund is invested.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

What happens if the Fund is unable to pay out?

There is no guarantee in place against the default of the Sub-Fund and you could lose your capital if this happens.

The Sub-Fund's assets are held with BNP Paribas, Luxembourg Branch and are segregated from the assets of other sub-funds of the Fund. The assets of the Sub-Fund cannot be used to pay the debts of other sub-funds.

The Sub-Fund would not be liable in the event of failure or default of the Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 316	EUR 948
Annual cost impact (*)	3.2%	1.6%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.4% before costs and 3.8% after costs.
