### What is this product?

#### TYPE OF PRODUCT:

The product is a Sub-Fund of DNCA Invest (the "Fund"), an Undertaking for collective investment in transferable securities (UCITS) under the laws of the Grand-Duchy of Luxembourg.

#### TERM

The Sub-Fund is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

#### OBJECTIVES

The Sub-Fund seeks to provide capital appreciation with low volatility by investing in convertible bonds. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria. As part of a discretionary management approach, the portfolio composition will not attempt to replicate the composition of a benchmark index from a geographical or sectoral perspective. Even so, the Refinitiv Eurozone Focus Hedged - EUR - index may be used as ex-post benchmark indicator.

The Sub-Fund is managed taking into consideration responsible and sustainable principles and promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. Additional information on SRI strategy may be obtained in the prospectus of the Sub-fund. The investment process is based on the following three stages: (i) selection of the investment universe combining a financial and extra-financial approach, (ii) Build the portfolio with a "Top down" approach (i.e. an approach which consists of looking to the overall portfolio) (iii) selection of securities ("Bottom up" approach) on the basis of a multi-factor analysis (fundamental analysis, valuation of the credit option and characteristics of the convertible bonds) followed by the overall analysis of the portfolio. The investment process is made of the combination of a global bond approach and stock-picking policy. It aims to create a portfolio with a lower volatility than an underlying equity investment based on a fundamental approach and a qualitative analysis of each issuer.

The Sub-Fund will at all times invest at least 50% of its total assets in convertible bonds, exchangeable bonds and mandatory redeemable bonds of issuers having their registered office in the EU or exercising the preponderant part of their economic activities in the EU within the following limits:

- Convertible or exchangeable bonds denominated in Euro: from 50% to 100% of its assets invested in convertible, exchangeable or mandatory redeemable bonds,
- Non Euro Convertible or exchangeable bonds: at most 15% of its total assets,
- Convertible bonds rated "investment grade" or whose issuer is rated "investment grade": at least 40% of its assets invested in convertible or exchangeable bonds
- Money-market and debt instruments: from 0% to 50% of its total assets.

In addition, the Sub-Fund will invest the remaining part of its total assets in warrants, subscription rights and other bonds with any equity link.

The Sub-Fund may invest up to 10% of its net assets in units or shares of UCITS or UCI.

The Sub-Fund may use exchange traded or OTC derivatives, including but not limited to, futures contracts and non-complex options negotiated on regulated markets for the purpose of hedging or increasing equity risk, credit risk and/or interest rate risk without seeking overexposure. The Sub-Fund may invest in securities denominated in any currency. However non-base currency exposure may be hedged back to the base currency to moderate currency exchange risks. More specifically, futures, and currency forwards may be used for that purpose. The currency exchange risk will not represent more than 15% of the total assets of the Sub-Fund.

The Sub-Fund is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

#### INTENDED RETAIL INVESTORS:

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

## OTHER INFORMATION:

The Depositary is BNP Paribas, Luxembourg Branch.

The redemption of shares may be requested each day.

Distributable amounts (net income and realised net capital gains or losses) are fully capitalised each year.

## What are the risks and what could I get in return?

### RISK INDICATOR

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Sub-Fund lie in the possibility of depreciation of the securities in which the Sub-Fund is invested.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

### PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

## What happens if the Fund is unable to pay out?

There is no guarantee in place against the default of the Sub-Fund and you could lose your capital if this happens.

The Sub-Fund's assets are held with BNP Paribas, Luxembourg Branch and are segregated from the assets of other sub-funds of the Fund. The assets of the Sub-Fund cannot be used to pay the debts of other sub-funds.

The Sub-Fund would not be liable in the event of failure or default of the Fund.

## What are the costs?

**The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.**

### COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	EUR 394	EUR 1 244
<b>Annual cost impact (*)</b>	3.9%	2.3%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.2% before costs and 0.9% after costs.
