# DNCA Invest - Convertibles - Class I - CHF

A sub-fund of the SICAV DNCA INVEST - ISIN: LU0765620918

This fund is managed by DNCA FINANCE Luxembourg

## Objectives and Investment Policy

### Essential management characteristics:

Convertible Bond Fund

The Sub-Fund seeks to provide capital appreciation with low volatility by investing in convertible bonds. As part of a discretionary management approach, the portfolio composition will not attempt to replicate the composition of a benchmark index from a geographical or sectoral perspective. Even so, the Exane Euro Convertibles Index may be used as ex-post benchmark indicator.

The investment process is made of the combination of a global bond approach and stock-picking policy. It aims to create a portfolio with a lower volatility than an underlying equity investment based on a fundamental approach and a qualitative analysis of each issuer.

The Sub-Fund will at all times invest at least 50% of its total assets in convertible bonds, exchangeable bonds and mandatory redeemable bonds of issuers having their registered office in the EU or exercising the preponderant part of their economic activities in the EU within the following limits:

- Convertible or exchangeable bonds denominated in Euro: from 50% to 100% of its assets invested in convertible, exchangeable or mandatory redeemable bonds,
- Non Euro Convertible or exchangeable bonds: at most 15% of its total assets,
- Convertible bonds rated "investment grade" or whose issuer is rated "investment grade": at least 50% of its assets invested in convertible or exchangeable bonds
- Money-market and debt instruments: from 0% to 50% of its total assets.

In addition, the Sub-Fund will invest the remaining part of its total assets in warrants, subscription rights and other bonds with any equity link.

The Sub-Fund may invest up to 10% of its net assets in units or shares of UCITS or regulated AIFs.

The Sub-Fund may invest in securities denominated in any currency. However non-base currency exposure may be hedged back to the base currency to moderate currency exchange risks. More specifically, futures, and currency forwards may be used for that purpose. The currency exchange risk will not represent more than 15% of the total assets of the Sub-Fund.

### Material risks not taken into account in this indicator:

Credit risk: in the event that an issuer is downgraded, the value of the bonds in the portfolio may fall, thus decreasing the sub-fund's net asset value.
