Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, or Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to an
environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental
or social objective
and that the investee
companies follow
good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product Name:** DNCA INVEST - EURO DIVIDEND GROWER **Legal entity identifier:** 213800HZWQKBEHDYB235

#### Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?					
•		Yes	• •	×	No
	susta	I make a minimum of inable investments with an conmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	×	char its o	economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	susta	l make a minimum of inable investments with a l objective:%		-	omotes E/S characteristics, but will not the any sustainable investments

# What environmental and/or social characteristics are promoted by this financial product?

The characteristics promoted by the Sub-Fund are governance, environment, social and societal criteria.

The management of the Sub-Fund relies on the proprietary analysis tool on environment, social and governance: ABA (Above and Beyond Analysis).

As part of the promotion of such characteristics, the Sub-Fund will in particular consider the following ESG matters:

o Environment: GHG emissions, airborne pollution, waterborne pollution, water consumption, land use, etc.

- Social: Excessive CEO Compensation, gender inequality, health and safety issues, child labor, etc.
- o Governance: Monitoring corruption and bribery, tax avoidance, etc.
- o Global ESG quality rating.

In this way, the investment process and resulting stock picking take into account internal scoring with respect to both corporate responsibility and sustainability of companies based on an extra-financial analysis trough a proprietary tool developed internally by the Management Company, with the "best in universe" method. There may be a sector bias.

The Sub-Fund does not use a benchmark for the purpose of attaining the ESG Characteristics promoted by the Sub-Fund.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by the Sub-Fund are:

- The "Above and Beyond Analysis" ("ABA", the proprietary tool) Corporate Responsibility Score: the main sustainability indicator used by the Sub-Fund is the ABA scoring (see part "Investment Strategy") based on the Corporate Responsibility and divided into four pillars: shareholder responsibility, environmental responsibility, employer responsibility, societal responsibility.
- The Transition to a Sustainable Economy Score: the Management Company complete this analysis by an assessment of companies' exposure to "Transition to a Sustainable Economy". This score is based on five pillars: demographic transition, healthcare transition, economic transition, lifestyle transition and ecologic transition
- Exposure to UN Sustainable Development Goals: the Management Company assesses for each company the part of revenues linked to one of the 17 Sustainable Development Goals of United Nations
- Carbon data: carbon footprint (t CO2/m\$ invested) of the Sub-Fund's portfolio,
- Carbon intensity (t CO2/m\$ revenues) of the Sub-Funds' portfolio.
- What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments of the Sub-Fund are the contributions of the investee companies to the United Nations Sustainable Development Goals (SDG). These companies are required to comply with the following eligibility conditions which are based on a "pass-fail" approach:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- minimum 5% revenues exposed to SDGs, according to the internal Taxonomy framework based on Sustainable Transition Activities (demographic transition and/or healthcare transition and/or economic transition and/or lifestyle transition and/or ecologic transition).
- minimum rating of 2 out of 10 on Corporate Responsibility Rating (taking into account controversies and PAI) combined with the exclusion policy, integrating the Do Not Significantly Harm on any environmental or social objective (see below)
- minimum rating of 2 out of 10 on Governance (Corporate Governance Practices)

The minimum rate of 2 of 10 (Corporate Responsibility in the proprietary tool ABA) is in line with the objective to Do No Significant Harm to the social or environmental objectives

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The adverse impacts of the companies' activities on environment and social objectives are directly integrated into the ABA Corporate Responsibility Rating (which integrates the indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 of the SFDR RTS and may lead to a downgrading of the ABA scoring under the minimum rating.

In this background, the Management Company is implementing in accordance with its Exclusion Policy. The following exclusions:

- thermal coal and unconventional oil and gas: the Management Company will gradually exclude companies involved in thermal coal and unconventional oil and gas business (please refer to the section below regarding the Sub-Fund's binding elements of the investment strategy for further details)
- controversy weapons: issuers are excluded from all the Management Company portfolios
- non-compliance with UN Global Compact: issuers with severe breaches to UN Global Compact principles are integrated in the Management Company "Worst Offenders" list and excluded from all the portfolios

How have the indicators for adverse impacts on sustainability factors been taken into account?

Principal Adverse Impacts are part of the Key Performance Indicators (the KPI) collected for the analysis. Issuers with severe Principal Adverse Impacts will be unfavourably noted by the ABA Corporate Responsibility Rating. A minimum rating of 2 out of 10 is thus consistent

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

to the DNSH approach (Do No Significant Harm to the social or environmental objectives).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Issuers that do not comply with the principles of the United Nations Global Compact are unfavorably rated for Corporate Responsibility in the ABA tool.

Issuers with controversies or in severe breach to UN Global Compact Principles (example: human rights or fight against corruption) based on the internal approach are excluded from the portfolio through the worst offenders list after internal analysis.

The "internal approach" as described below allow the Management Company to define a list of issuers identified as being in breach of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and which have been qualified as having committed a "severe breach" by the Management Company's Ethics Committee. These issuers are therefore included in an exclusion list of the "worst offenders" and which are prohibited from investing.

To perform this analysis, the Management Company uses an external data provider's database to:

- 1) extract issuers with "norms based" alerts:
- 2) filter out irrelevant issuers;
- 3) qualitative analysis of the infringements by the Management Company's Ethics Committee;
- 4) include issuers identified as having committed a "severe breach" in the list of worst offenders.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### Does this financial product consider principal adverse impacts on sustainability factors?

**x** Yes, \_\_\_\_\_

For Private issuers, the Sub-Fund is taking into account the principal adverse impacts on sustainability factors.

- the Principal Adverse Impact analysis is part of the Corporate Responsibility Rating (See below),
- the Management Company is implementing an Adverse Impact on Sustainability Policy, measuring the PAI. The Policy first intend to monitor the contributions to climate change (CO2 emissions, CO2 intensity, implied temperature) in the context of the "Climate Trajectory" objectives.

Further information may be found in the annual report in respect of the Sub-Fund.

In addition, the Sub-Fund aims to score better than its investment universe on the following indicators:

- GHG intensity: This indicator is expressed in tonnes of CO2/M\$ invested in the fund's portfolio;
- Ratio of dangerous or radioactive waste.

The investment

**strategy** guides investment decisions

based on factors such as investment objectives and risk

tolerance.

No

#### What investment strategy does this financial product follow?

In line with the fundamental approach of the management team, the investment process is based on the selection of the investment universe combining a financial (quantitative and micro-economic) and extra-financial (qualitative) approach with two steps:

- the selection of issuers pursuant to the financial approach described above, and
- the exclusion of issuers which have a high-risk profile in terms of corporate responsibility (rating below 2/10 in the ESG proprietary tool) or exposed to major controversies. This extra-financial filter excludes a minimum of 20% of issuers based on the extra-financial analysis describes before.

The ABA scoring: proprietary tool of analysis and Corporate Responsibility Rating Corporate responsibility is a useful information's pool used to anticipate companies' risks especially looking at the interplay with their stakeholders: employees, supply chains, clients, local communities, and shareholders..., regardless of the sector of activities.

The ABA analysis of corporate responsibility is broken down into four pillars:

- shareholders responsibility (board of directors and general management, accounting practices and financial risks, etc.),

#### 1110 1115

- environmental responsibility (environmental footprint of the production chain and product life cycle or responsible supply, energy consumption and water consumption, company CO2 emissions and management of waste, etc.),
- responsibility towards workers ethics and working conditions of the production chain, treatment of employees safety, well-being, diversity, employee representation, wages, quality of products or services sold, etc.) and,
- societal responsibility (Product quality, safety and traceability, respect of local communities and human rights, etc.

Each pillar is rated independently by the Management Company and weighted in accordance to how material it is for the targeted company. Each pillar is broken down into a set of criteria, selected in accordance to the materiality (correlation with the economic performance), which are around 25 in total (as listed in the below table). Those criteria can be quality of board assessment, CEO remuneration, impact on biodiversity, climate policy and energy efficiency, etc.

Poison pill, limitation of votes Size and composition of the ExCom Rotation of leaders, checks and balances Quality of the strategy Independence rate of the Board and its committees  CEO compensation  Variable compensation consistent with objectives and results  ESG criteria in the variable compensation  History of accounting methods/reporting Independence of the statutory auditors  Trust in guidance and transparency  Profit warning history  Access to management  Environmental management  Environmental Management System  (EMS) and reporting scope  Quality and consistency of reporting, quantified objectives  Governance: dedicated director  Implementation of an energy efficiency  policy  Precise reporting and quantified objectives (scope 1, 2 and 3, CO2 emissions, carbon intensity)  Perimeter of the environmental certification process  Integration of regulations related to the		Desmant for minority	Control structure

This in-depth analysis, combining qualitative and quantitative research, leads to a rating out of 10.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

On one hand, the Sub-Fund implements its strategy within two types of bindings elements: exclusions applied for the Management Company, and exclusions specific to the strategy.

- 1. Exclusions applied for the Management Company:
  - Exclusion based on United Nations Global Compact breaches: after analysis and decision by the Management Company, companies are listed by the Management Company on a "worst offenders" list and excluded from all portfolios
  - Exclusion related to the Management Company engagement to disinvest in non-conventional oil and gas activities and coal activities based on sector activities, according to the table below:

Activities	Exclusion from March	Issuers having their registered office in the European Union or in the EOCD		Issuers having their registered office outside of the EOCD	
	2022	Exclusion from December 2027	Exclusion from December 2030	Exclusion from December 2030	Exclusion from December 2040

Thermal Coal Production	From 10% of the revenues	From 5% of the revenues	Definitive exit (0% of the revenues)	From 5% of the revenues	Definitive exit (0% of the revenues)
Coal-based electricity generation	From 10% of the revenues	From 5% of the revenues	Definitive exit (0% of the revenues)	From 5% of the revenues	Definitive exit (0% of the revenues)
Activities		Exclusion from December 2030	Exclusion from December 2040	Exclusion from December 2030	Exclusion from December 2040

- 2. Exclusions specific to the strategy followed by the Sub-Fund:
  - Exclusions of issuers which have a "Severe Risk" profile in terms of Corporate Responsibility This category represents companies with a Corporate Responsibility Rating below 2 out of 10 within our internal rating.
  - Sectorial Exclusions as defined in the Management Company's "Exclusion Policy".

The above-mentioned applied exclusions which are further detailed in the Management Company's "Exclusion Policy" and "Responsible Investor Policy" are binding and further details thereon are available on the website of the Management Company (<a href="https://www.dnca-investments.com/lu/areas-of-expertise/sri">https://www.dnca-investments.com/lu/areas-of-expertise/sri</a>). Details of the Sub-Fund's exclusion policy are also available from the Management Company upon request.

Moreover, a strict controversial weapons exclusion and sectorial exclusion policy is implemented and is available on the website of the Management Company (https://www.dnca-investments.com/lu/areas-of-expertise/sri).

On the other hand, the Sub-Funds is also bound to comply with the 20% minimum proportion of sustainable investments determined in accordance with the criteria described under the section « What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives? ».

The Sub-Fund excludes at least 30% of the worst issuers from its investment universe and carries out extra-financial analysis of at least 90% of the securities held by the subfund. As such, the sub-fund will not invest in these issuers.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy? Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the share
   of revenue from
   green activities of
   investee
   companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

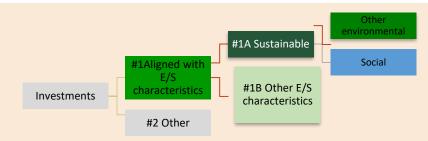

The Sub-Fund applies a minimum reduction of the investment universe of 30%.

### What is the policy to assess good governance practices of the investee companies?

The Governance is one the assessment axes of the Corporate Responsibility: The Shareholder Responsibility. It is rated out of 10 based on 6 criteria: sound management structures (i.e. the quality of the management the board and committees of the issuer), overall issuers' remuneration of staff (focusing on the CEO's remuneration) and tax compliance (alignment of the tax rate with the local economic presence, presence in tax havens, change in the tax rate over 10 years), a good employee relation, the quality of the financial communication, the accounting risks and the respect for minority shareholders. Around thirty KPIs allow the assessment of the governance practices associated with these 6 criteria. In addition, controversies related to the good governance practices impact the overall rating.

#### What is the asset allocation planned for this financial product?

The Sub-Fund intends to invest 80% minimum of its net assets in investments aligned with the environmental and social characteristics it promotes and 20% of those are directly invested in sustainable investments. The remaining portion of the Sub-Fund's net assets (#2 Other) will consist of financial derivative instruments, deposits at sight, money market funds, money market instruments and other

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

deposits used for hedging and/or exposure and efficient portfolio management purposes and to manage the liquidity of the portfolio or to reduce any specific financial risk.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Sub-Fund does not invest in financial derivative instruments in order to attain the environmental or social characteristics it promotes.

To comply with the

EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

low-carbon fuels by the end of 2035. For

**nuclear energy**, the criteria include comprehensive safety

management rules.

**Enabling activities** 

directly enable other

activities to make a

contribution to an

Transitional activities are activities for which

low-carbon alternatives

are not yet available and among others have

corresponding to the

best performance.

switching to renewable power or

and waste

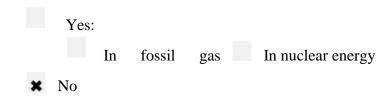

substantial

objective.

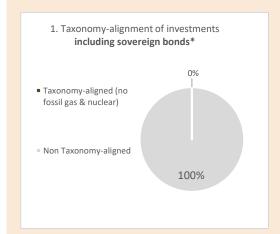

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

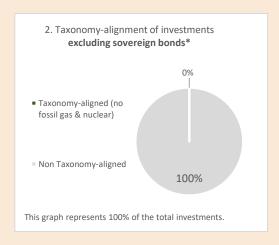

Not applicable

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What is the minimum share of investments in transitional and enabling activities?

0%

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund will invest at least 1% of its net assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy Regulation. However, the aggregated minimum share of sustainable investments across both environmental and social objectives represents 20% of its net assets.

#### What is the minimum share of socially sustainable investments?

The Sub-Fund will invest at least 1% of its net assets in socially sustainable investments. However, the aggregated minimum share of sustainable investments across both environmental and social objectives represents 20% of its net assets.

# What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Sub-Fund may invest in financial derivative instruments, deposits at sight, money market funds, money market instruments and other deposits included under "#2 Other". Those instruments may be used by the Management Company to manage the liquidity of the portfolio or increasing exposure or to reduce any specific financial risk (for example: currency risk).

No minimum environmental or social safeguards will be in place in relation to such assets.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The reference benchmark of the Sub-Fund does not intend to be consistent with the environmental or social characteristics promoted by the Sub-Fund.

• How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?
N/A

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

N/A

• How does the designated index differ from a relevant broad market index?
N/A

they promote.

Where can the methodology used for the calculation of the designated index be found?

N/A

### Where can I find more product specific information online?
