What is this product?

TYPE OF PRODUCT:

The product is a Sub-Fund of DNCA Invest (the "Fund"), an Undertaking for collective investment in transferable securities (UCITS) under the laws of the Grand-Duchy of Luxembourg.

TERM

The Sub-Fund is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

OBJECTIVES

The investment objective of the Sub-fund is to seek performance by taking advantage of developments in the equity markets and companies having their registered office in Euro Zone countries which benefit from the acceleration of urbanization, over the recommended investment term of 5 years. These companies are chosen according to an SRI approach for the quality of their economic fundamentals, for their quality of global or local leaders on their respective markets analyzed through the systematic integration of environmental, social / societal and governance (ESG) criteria (such as energy consumption, CO2 emission), or even ethical practices of the company.

The investment strategy is based on active and discretionary management style. The Sub-Fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. Additional information on SRI strategy may be obtained in the prospectus of the Sub-fund.

The Sub-Fund may at any time be exposed to: equities and similar or rights attached to the ownership of these equities, from 75 to 110% of its net assets; Equities listed in markets of countries which are OECD member states: at least 80% of its net assets; Equities with small capitalization (below 1 billion EUR or any other currency) up to 20% of its net assets; Equities from issuers having their registered office in emerging countries, up to 10% of its net assets. Fixed income securities and money market instruments from issuers of the public or private sector having their registered office in a country which is a OECD member state, depending on market opportunities, and having at the time of the purchase a Standard & Poor's rating of at least A3 short term rating or A- long-term rating, or being considered as equivalent by the Management Company using similar criteria, or through bonds and money market funds: up to 25% of its net assets; deposits: up to 25% of its net assets; other financial instruments (within the meaning of Article 41 (2) a) of the Law) up to 10 % of its net assets. The Sub-Fund can be exposed to all currencies other than the Euro, bringing the exchange risk to 30% maximum of its net assets. The Sub-Fund may invest up to 10% of its net assets in units and/or shares of UCITS and/or other UCIs and/or regulated AIFs open to non-professional investors and/or ETFs. In order to achieve the investment objective, the Sub-Fund may also invest in equities or related financial derivative instruments as well as in convertible bonds, warrants and rights which may embed derivatives, for the purpose of hedging or increasing equity and currency exchange risk without seeking overexposure.

The Sub-Fund is actively managed. The Sub-Fund uses the benchmark for the calculation of the Performance Fee and for performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant. The reference benchmark does not intend to be consistent with the environmental or social characteristics promoted by the Sub-Fund.

INTENDED RETAIL INVESTORS:

The redemption of shares may be requested each day.

Income is distributed.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Sub-Fund lie in the possibility of depreciation of the securities in which the Sub-Fund is invested.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:	5 years		
Example investment	EUR 10 000		
	If you exit after 1 year	If you exit after 5 years

What happens if the Fund is unable to pay out?

There is no guarantee in place against the default of the Sub-Fund and you could lose your capital if this happens.

The Sub-Fund's assets are held with BNP Paribas, Luxembourg Branch and are segregated from the assets of other sub-funds of the Fund. The assets of the Sub-Fund cannot be used to pay the debts of other sub-funds.

The Sub-Fund would not be liable in the event of failure or default of the Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 401	EUR 1 320
Annual cost impact (*)	4.0%	2.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.2% before costs and 1.8% after costs.
