DNCA INVEST
EUROSE

FLEXIBLE ASSET

Investment objective

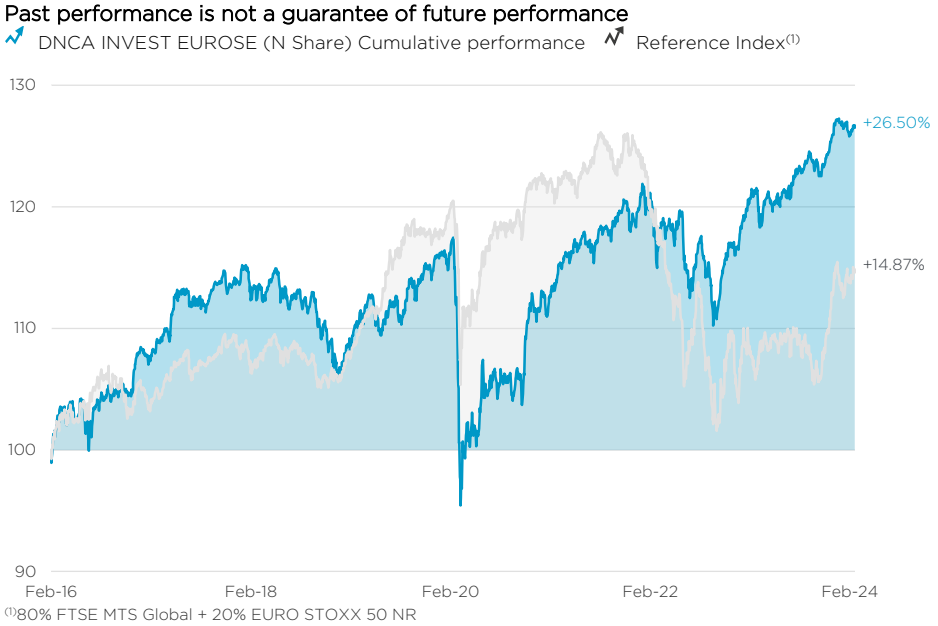

The Sub-Fund seeks to outperform the 20% Eurostoxx 50 + 80% FTSE MTS Global composite index calculated with dividends reinvested, over the recommended investment period. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria.
To achieve its investment objective, the investment strategy is based on active discretionary management.

Portfolio managers comments

Apart from a few occasionally violent negative reactions on the stock markets, European companies' results are generally well received. What is more, management forecasts and expectations are not such as to give cause for concern about economic trends. At the same time, economic indicators and inflation are strengthening the case for the famous benign "soft landing" scenario. The markets are now only expecting between 3 and 4 rate cuts by the ECB this year, with the first move expected in June. Logically, yields rebounded strongly over the month, with the German 10-year ending the month at 2.4% (+25bp). Credit spreads narrowed and the EURO STOXX 50 NR added a further 5% to its performance.

DNCA invest Eurose was down slightly in February (-0.39%), as it has been since the start of the year (-0.44%).

Equities made a negative contribution in February, with the selection penalised by the decline in the banking sector (BNP Paribas, Crédit Agricole and Société Générale) and by Sanofi following disappointing figures. In response to better-than-expected earnings, Air Liquide, Bouygues and Michelin were up by more than 7%. Over the course of the month, the fund strengthened its positions in ALD, BNP Paribas, Bouygues, Chargeurs, Société Générale and TotalEnergies. Conversely, only the Veolia Environnement position was reduced. At the end of February, the fund's net exposure to equities was 17.8%, and the portfolio's main holdings were : TotalEnergies (3.3%), Saint-Gobain (1.9%), Sanofi (1.8%), BNP Paribas (1.8%) and Bouygues (1.8%). Hedging accounted for 7.8% (EURO STOXX 50 and CAC 40 futures). The financial characteristics of the portfolio show a P/E for 2024 of 9.4x (EURO STOXX 50 at 14.3x), while the dividend yield for 2024 is estimated at 4.5% (EURO STOXX 50 at 3.0%).

On the bond side, large maturities (Unicredit, Thyssenkrupp, iliad, Caixabank) and the continued reduction in exposure to the most heavily indebted companies are freeing up cash to take advantage of certain opportunities. For valuation reasons, Elior 7/2026 and Toyota 10/2024 have been sold, while Ontex 7/2026, UPC 6/2029, CGG 4/2027 and VodafoneZiggo 1/2029 have been further reduced. In response to the unpleasant surprise of the abrupt termination of the contract for the future production of microLEDs, the ams-OSRAM 2029 line has been reduced. The cash freed up by these operations is being used on opportunities, mainly on the primary market: Lloyds 3/2027 senior non-preferred, Ineos Group 4/2029, Epiroc 2/2031, Caixabank 2/2029 senior preferred, Banca Ifis 2/2029, Avis Budget 2/2029 and Forvia 6/2031. Enel 11/2025 in sustainability-linked format and Allied Irish Bank 5/2031 were also initiated, while Jyske Bank, Iberdrola, Getlink and Verisure were reinforced. The fall in the price of Teleperformance bonds due to concerns about artificial intelligence is being used to slightly strengthen the 2028 maturity line.

During the month, as interest rates continued to rise, the interest-rate hedge was withdrawn, taking bond sensitivity to 2.2 compared with 2.1 one month earlier.

The extra-financial characteristics of the portfolio show a responsibility performance of 5.05 and an exposure to sustainable transition of 84.49%.

Market expectations of the next move in key rates in the eurozone continued to evolve rapidly over the month. Expectations are now much more reasonable for 2024 (4 cuts of 25bp), but uncertainty logically remains high for next year. The market is expecting 3 further cuts. Following the withdrawal of interest-rate hedges from the portfolio, the management team could consider gradually increasing the fund's sensitivity. Note that the average bond yield is still up slightly at 4.3%, close to the expected dividend yield on the equity portfolio (4.5%).

Analysis methodology

We develop proprietary models based on our expertise and conviction to add tangible value in the selection of portfolio securities. DNCA's ESG analysis model, Above & Beyond Analysis (ABA), respects this principle and offers a rating that we control the entire construction. Information from companies is the main input to our rating. The methodologies for calculating ESG indicators and our responsible investor and engagement policy are available on our website by clicking here.

(1) The rating out of 10 integrates 4 risks of responsibility: shareholder, environmental, social and societal. Whatever their sector of activity, 24 indicators are evaluated, such as social climate, accounting risks, suppliers, business ethics, energy policy, quality of management.

(2) The ABA Matrix combines the Responsibility Risk and the Sustainable Transition exposure of the portfolio. It allows us to It allows companies to be mapped using a risk/opportunity approach.

(3) 1 No poverty. 2 Zero hunger. 3 Good health and well-being. 4 Quality education. 5 Gender equality. 6 Clean water and sanitation. 7 Clean and affordable energy. 8 Decent work and economic growth. 9 Industry, innovation and infrastructure. 10 Reduced inequalities. 11 Sustainable cities and communities. 12 Sustainable consumption and production. 13 Tackling climate change. 14 Aquatic life. 15 Terrestrial life. 16 Peace, justice and effective institutions. 17 Partnerships to achieve the goals.

(4) 5 transitions based on a long-term perspective of the financing of the economy allow the identification of activities with a positive contribution to sustainable development and to measure the exposure of companies in terms of turnover as well as exposure to the UN Sustainable Development Goals.

+The coverage rate measures the proportion of issuers (equities and corporate bonds) taken into account in the calculation of the extra-financial indicators. This measure is calculated as a % of the fund's net assets adjusted for cash, money market instruments, derivatives and any vehicle outside the scope of "listed equities and corporate bonds".

This product promotes environmental or social characteristics, but does not have as its objective a sustainable investment. It might invest partially in assets that have a sustainable objective, for instance qualified as sustainable according to the EU classification.

This product is subject to sustainability risks as defined in the Regulation 2019/2088 (article 2(22)) by environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

If the portfolio investment process can incorporate ESG approach, the portfolio's investment objective is not primarily to mitigate this risk. The sustainability risk management policy is available on the website of the Management Company.

The reference benchmark as defined in the Regulation 2019/2088 (article 2(22)) does not intend to be consistent with the environmental or social characteristics promoted by the fund.

Glossary

Beta. Measures the average extent to which a fund moves relative to the broader market. The beta of a market is 1. A fund with a beta of more than 1 moves on average to a greater extent than the market. A fund with a beta of less than 1 moves on average to a lesser extent. If beta is a minus number, it is likely that the stock and the market move in opposite directions.
Convertible Bond. Hybrid securities that have both bond and equity characteristics. Convertible bonds make periodic interest payments like a bond, but bondholders also get an option to exchange their bonds for a specified number of shares of common stock. Convertible bonds typically carry lower coupon rates, thus reducing the corporation's cost of borrowing.
Correlation coefficient. The correlation coefficient is a measure of correlation. It is used to determine the relationship between two assets over a given period. A positive coefficient means that the two assets move in the same direction. Conversely, a negative coefficient means that the assets move in the opposite direction. The correlation or decorrelation can be more or less strong and varies between -1 and 1.
Delta. The delta of a position expresses the change in the price of an option when its underlying asset price varies. It corresponds to the derivative of the theoretical value of the option relating to the price of the underlying asset.
Maturity. The time when a bond or other debt instrument is due to for redemption (is due to mature); or the length of time between the issue of such an instrument and the date it is due for redemption (the maturity date).
Sensitivity. The sensitivity of a bond measures the change in its percentage value induced by a given change in interest rates.
Sharpe Ratio. A way of measuring the historical risk-adjusted return on an investment. It is the average previous return minus the risk-free return, divided by the standard deviation (a measure of risk that looks at the diversion of actual returns from expected returns).
Sharpe Ratio. The Sharpe ratio measures the excess return over the risk-free money rate of an asset portfolio divided by the standard deviation of that return. It is therefore a measure of the marginal return per unit of risk. It is used to measure the performance of managers with different risk policies.
Tracking error. Tracking Error is a measure of how closely an investment portfolio follows the index against which it is benchmarked. It is the difference in the return earned by a portfolio and the return earned by the benchmark against which the portfolio is constructed. For example, if a bond portfolio earns a return of 5.15% during a period when the portfolio's benchmark (say, for example, the Lehman Brothers Index) produces a return of 5.06%, the tracking error is .09%, or 9 basis points.
