Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DNCA Invest - Evolutif - Class AD - EUR
A sub-fund of the SICAV DNCA INVEST - ISIN: LU1055118761
This fund is managed by DNCA FINANCE

Objectives and Investment Policy

Essential management characteristics:

Multi-Asset Fund

The Sub-Fund seeks to outperform the 60% Eurostoxx 50, 30% FTSE MTS EMU GOV BOND 1-3 years, 10% EONIA composite index calculated dividends reinvested, over the recommended investment period, while protecting the capital during adverse periods through opportunistic management and flexible asset allocation.

The Sub-Fund's investment strategy relies on active discretionary management using a stock picking policy. This policy is all based on fundamental analysis developed through main investment criteria such as market assessment, issuer's financial structure, management quality, issuer's market position or regular contacts with issuers. The Sub-Fund will be invested either in equities, bonds or money market instruments by adapting the investment strategy to the economic situation and the Investment Manager's expectations.

Up to 100% of its net assets, the Sub-Fund can be exposed to shares of issuers in all market capitalisation without geographical constraint. Shares of issuers with capitalisation below 1 billion euros may not exceed 10% of its net assets. The part of investment in shares of companies having their registered office in emerging countries (such as but not limited to Asian countries except Japan, or South America, etc.) may account up to 20% of net assets.

The Sub-Fund may invest up to 70% of its net assets, in fixed income securities and money market instruments from issues of the public or private sector, depending on market opportunities without any constraint in terms of rating or duration. Nevertheless, investment in non "Investment Grade" or non-rated debt securities (i.e. have a Standard & Poor's rating below A-3 short-term rating or BBB- long-term rating or equivalent) may not exceed 30% of its net assets. The Investment Manager shall not solely base its investment decisions, risk assessment on the ratings assigned by independent rating agencies but shall also proceed to its own analysis of credit.

The Sub-Fund may invest in securities with embedded derivatives such as convertible bonds. Up to 10% of its net assets, the Sub-Fund may invest in units and/or shares of UCITS or AIFs.

In order to achieve the investment objective, the Sub-Fund may also invest up to 30% of its net assets in financial derivative instruments for the purpose of hedging or increasing equity exposure, interest rate risk or currency risk without seeking exposure.

Benchmark Information : The Sub-Fund is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Investment Manager is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Investment Manager is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

Other important information:

Income is distributed
The redemption of units/shares may be requested each day.

Recommended investment period:
This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

Lower risk

Lower potential reward

1

2

3

4

5

6

7

Higher risk

Higher potential reward

Material risks not taken into account in this indicator:

Credit risk: in the event that an issuer is downgraded, the value of the bonds in the portfolio may fall, thus decreasing the sub-fund's net asset value.

Risk of using derivative products: the use of derivative instruments may reduce the net asset value in case of exposure in a direction opposite to that of the market trend.

Liquidity risk: on certain markets and in given market situations, the manager may find it difficult to sell certain financial assets.

Exchange risk: investments made in currencies other than the euro are exposed to a deterioration in exchange rates for these currencies against the euro, thus decreasing the fund's net asset value.

The occurrence of one of these risks may lead to a reduction in the net asset value.
Charges

The charges paid serve to cover the operating costs of the UCITS, including those of marketing and distributing the shares or units. These costs reduce the potential growth of the investments.

<table>
<thead>
<tr>
<th>One-off charges taken before or after you invest</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry charge</td>
<td>2.00%</td>
</tr>
<tr>
<td>Exit charge</td>
<td>0.00%</td>
</tr>
</tbody>
</table>

The percentage indicated is the maximum that may be taken out of your capital before it is invested. In certain cases the investor pays less. You can obtain the actual amount of entry and exit charges from your financial advisor or the establishment with which you place your order.

<table>
