DNCA Invest - Sérénité Plus - Class I - EUR
A sub-fund of the SICAV DNCA INVEST - ISIN: LU1490785331
This fund is managed by DNCA FINANCE

Objectives and Investment Policy

Essential management characteristics:

European Bond Fund

The Sub-Fund seeks to outperform the FTSE MTS Index 1-3 years calculated with coupons reinvested on the recommended investment period.

The Sub-Fund will select securities in the fixed income universe through macroeconomic, technical, financial and credit analyses. Balance sheet and cashflows analyses are core to the selection process. The modified duration of the Sub-Fund will stay between 0 and 4, without any restriction on the modified duration of individual securities in the Sub-Fund. The Sub-Fund will only invest in securities denominated in Euro.

The Sub-Fund may invest at any time within the following limits in:
- up to 100% of its total assets may be exposed to bonds and debt securities denominated in Euro (corporate bonds, Government bonds, convertible & exchangeable bonds, perpetual bonds, etc), composed of securities issued by public or private sector issuers, without any rating constraints including non-rated issues.
- up to 10% of its net assets in equities denominated in Euro, obtained from conversion of convertible bonds or by any other means.

The Sub-Fund's fixed income portfolio may be composed of securities belonging to the "speculative grade" category (i.e. not belonging to the "investment grade" category or non-rated). For up to 5% of its net assets, the Sub-Fund may invest in securities which may qualify as distressed (i.e. which have a Standard & Poor's long-term rating below CCC, or equivalent). In all cases, the Sub-Fund will not invest in securities which may qualify as "in default" at the time of the investment. Fixed income securities which may be downgraded will be disposed of as soon as possible with due regards to the interest of shareholders.

The Sub-Fund may invest up to 5% of its net assets in transferable securities and money market instruments for efficient portfolio management.

The Sub-Fund may make use of deposits by a maximum of 20% of its total assets and may use techniques and instruments relating to interest rate sensitivity or exploiting any anomaly in the interest rate structure within the limit of 100% of the Sub-Fund's net assets.

The Sub-Fund may invest in exchange traded financial derivative instruments or OTC derivatives in order to achieve the purpose of limiting interest rate sensitivity or exploiting any anomaly in the interest rate structure within the limit of 100% of the Sub-Fund's net assets.

The Sub-Fund may select securities in the fixed income universe through macroeconomic, technical, financial and credit analyses. Balance sheet and cashflows analyses are core to the selection process. The modified duration of the Sub-Fund will stay between 0 and 4, without any restriction on the modified duration of individual securities in the Sub-Fund. The Sub-Fund will only invest in securities denominated in Euro.

Benchmark Information : The Sub-Fund is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Investment Manager is taking investment decisions with the intention of achieving the Sub-Fund’s investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Investment Manager is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or insignificant.

The historical data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile of the UCITS. The risk category associated with this sub-fund is not guaranteed and may change over time. The weakest category does not mean no risk. The risk level of this UCITS is due to exposure to fixed income markets. The fund does not benefit from any capital protection or guarantee.

Material risks not taken into account in this indicator:

Credit risk: in the event that an issuer is downgraded, the value of the bonds in the portfolio may fall, thus decreasing the fund's net asset value.

Liquidity risk: on small- and medium-cap markets, the volume of stock market-listed securities is smaller, so downward market movements are greater and faster than for large-cap shares. The net asset value of the UCITS may therefore decline faster and by more.

The occurrence of one of these risks may lead to a reduction in the net asset value.
Charges

The charges paid serve to cover the operating costs of the UCITS, including those of marketing and distributing the shares or units. These costs reduce the potential growth of the investments.
