### What is this product?

#### TYPE OF PRODUCT:

The product is a Sub-Fund of DNCA Invest (the "Fund"), an Undertaking for collective investment in transferable securities (UCITS) under the laws of the Grand-Duchy of Luxembourg.

#### TERM

The Sub-Fund is established for an unlimited duration and liquidation must be decided upon by the Board of Directors.

#### OBJECTIVES

The Sub-Fund seeks to achieve a positive performance higher than the following composite Index: 50% EUROSTOXX 50 Net Return + 50% €STR, throughout the recommended investment period. For that purpose, the Management Company will try to maintain an average annual volatility between 10% and 15% in normal market conditions. Investor's attention is drawn by the fact that the management style is discretionary and integrates environmental, social/societal and governance (ESG) criteria.

The Sub-Fund is managed taking into consideration responsible and sustainable principles and promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. Additional information on SRI strategy may be obtained in the prospectus of the Sub-fund. The Sub-Fund's strategy qualifies as absolute return equity and relies on fundamental financial analysis performed by the Management Company. It invests in European issuers (EEA, Switzerland and UK). The gross equity exposure associated with investments of the Sub-Fund (Longs and Futures) cannot exceed 200% of the net assets of the Sub-Fund. With a net exposure which can evolve from 0 to + 100% of the assets under management, the performance is based on two pillars: 1 – capacity of the team to make the good assumptions regarding net market exposure and 2 - capacity of the team to make a good stock picking and to detect equities that have the characteristics to outperform their market indexes or their sector indexes.

The Sub-Fund may at any time be invested in:

- Equities issued in Europe (EEA plus Switzerland and UK) or equivalent financial instruments (such as ETF, futures, CFD and/or DPS, etc.): from 0% to 100% of its net assets,
- Equities issued outside of EEA plus Switzerland and UK: up to 10% of its net assets,
- Equities with total capitalisation below 150 million Euros: up to 5% of its net assets,
- money-market instruments or deposits: from 0% to 100% of its net assets in adverse market conditions and from 0% to 25% in case of normal market conditions,
- other financial instruments: up to 10% of its net assets.

The Sub-Fund may invest up to 10% of its net assets in units and/or shares of UCITS and/or AIFs.

For the purpose of hedging and increasing equity or currency risk without seeking overexposure, the Sub-Fund also operates on regulated markets of futures on European indexes and futures on sectors (included or not in a DPS). The Sub-Fund can also operate on the foreign exchange markets to cover investments realised outside the euro area or relating to the United Kingdom, Switzerland or Scandinavia. The Sub-Fund is actively managed and uses the benchmark for the calculation of the performance fee and performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

#### INTENDED RETAIL INVESTORS:

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

#### OTHER INFORMATION:

The Depositary is BNP Paribas, Luxembourg Branch.

The redemption of shares may be requested each day.

Distributable amounts (net income and realised net capital gains or losses) are fully capitalised each year.

## What are the risks and what could I get in return?

### RISK INDICATOR

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the Sub-Fund lie in the possibility of depreciation of the securities in which the Sub-Fund is invested.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

### PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

## What happens if the Fund is unable to pay out?

There is no guarantee in place against the default of the Sub-Fund and you could lose your capital if this happens.

The Sub-Fund's assets are held with BNP Paribas, Luxembourg Branch and are segregated from the assets of other sub-funds of the Fund. The assets of the Sub-Fund cannot be used to pay the debts of other sub-funds.

The Sub-Fund would not be liable in the event of failure or default of the Fund.

## What are the costs?

**The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.**

### COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	EUR 494	EUR 1 836
<b>Annual cost impact (*)</b>	4.9%	3.3%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.5% before costs and 1.2% after costs.
